

# ESMO PUBLIC POLICY

**Shaping health policy  
globally to support medical  
oncologists and the patients  
they serve.**

[esmo.org](http://esmo.org)

# ESMO Public Policy Committee

The ESMO Public Policy Committee represents the voice of medical oncology in global, regional and national policy-making, aiming to ensure that our members' priorities are reflected in health policies across the world.

## **Patient Advocates Working Group - working with patients, for patients**

Our Patient Advocates Working Group supports the work of the Public Policy Committee to deliver policy solutions that optimise patient care, improve cancer-specific information and education, and strengthen both patient autonomy and rights.

## **Cancer Medicines Committee**

Our Cancer Medicines Committee works to address the topic of access to medicines at the European and global policy levels to ensure that all patients have access to the medicines they need, when they need them.

# Sharing our expertise with policy makers to help deliver Europe's Beating Cancer Plan

## Preventing Cancer

- Lowering the incidence of cancer by helping to secure decreased occupational exposure limits to asbestos, a highly dangerous carcinogenic.
- Preventing lung cancer cases in Europe through our efforts to tighten EU limits on air pollution.
- Fighting the tobacco epidemic to protect public health and reduce preventable cancer cases.
- Promoting policies to boost vaccination coverage against cancer-causing viruses.

## Strengthening the Research Environment

- Shaping a European Health Data Space that boosts oncology research and the development of innovative treatments for cancer patients.
- Securing cancer as a priority in the *Horizon Europe* programme and other EU research programmes.

## Improving Access to Medicines & Treatment

- Shaping pharmaceutical legislation to improve the availability, accessibility and affordability of innovative medicines for cancer patients.
- Informing Health Technology Assessment processes to improve accessibility to innovative cancer treatments.

# Working with international partners to shape health policy across the world

## World Health Organization (WHO)

- ESMO is a non-state actor (NSA) in official relations with the WHO since 2013 and works with its secretariat and member states towards:
  - » The delivery of universal health coverage to ensure the continued and timely access to affordable essential health services;
  - » Improving the health financing, recruitment, training, and retention of the oncology workforce;
  - » Ensuring that cancer patients' interests are included in updated international preparedness strategies and planning for health emergencies.

## **The International Agency for Research on Cancer (IARC)**

- ESMO has partnered with IARC - the WHO's specialised agency on cancer - to develop, since 2020, its World Cancer Report Updates learning platform and promote research into prevention to help reduce the global burden of cancer.

## **United Nations' Economic and Social Council (ECOSOC)**

- ESMO's special consultative status - the highest rank granted by the UN to non-governmental organisations, and awarded to ESMO in 2020 - with the ECOSOC provides us with the opportunity to work with the UN and its members to help tackle the global scourge of cancer through the delivery of Sustainable Development Goals 3.4 "by 2030, to reduce by one third premature mortality from NCDs through prevention and treatment", and 3.8 "Achieve Universal Health Coverage".

# ESMO PUBLIC POLICY

Please do get in touch should you have questions concerning ESMO's public policy work or if you want to discuss how we could help tackle the challenges facing medical oncologists in your country of employment or origin.
