

# MULTIPLEX BIOMARKER PROFILING IN CONTEMPORARY ONCOLOGY: FROM TESTING TO UNDERSTANDING AND IMPACTING

## Chairs

Umberto Malapelle, Naples, Italy  
Emiliano Calvo, Madrid, Spain

<b>MONDAY, 20 SEPTEMBER 2021</b>		
08:45 - 10:15 CEST, CHANNEL 3		
<b>08:45</b>	<b>Live introduction</b>	Umberto Malapelle Naples, Italy
<b>08:50</b>	<b>A clinical case of a female patient with advanced RET-fused non-small cell lung adenocarcinoma: MRD, disease monitoring, secondary resistance</b>	Gabriela Fernandes Porto, Portugal
<b>09:05</b>	<b>Technologies for multiplex molecular testing and ESMO recommendations for practice and research application in solid tumours</b>	Albrecht Stenzinger Heidelberg, Germany
<b>09:20</b>	<b>Molecular tumour boards and application in oncology networks: Challenges and opportunities on the road towards optimizing patient benefit</b>	Rodrigo Dienstmann, São Paulo, Brazil
<b>09:35</b>	<b>Availability, turnaround times and report interpretation: Implementation barriers and knowledge gaps related to tumour molecular profiling in practice</b>	Emiliano Calvo Madrid, Spain
<b>09:50</b>	<b>Live conclusions</b>	Emiliano Calvo Madrid, Spain
<b>09:55</b>	<b>Q&amp;A and live discussion</b>	All

This educational activity is provided by ESMO and co-supported by Thermo Fisher Scientific and Eli Lilly.
